

# The Power of OZONIDE

## Para-Rizol

### *a complete guide*

OZONIDES are concentrated ozonated herb oils with powerful healing abilities, which contain active oxygen (O<sub>3</sub>). In the body active Oxygen eliminates anaerobic parasites as well as over-aged, diseased or cancerous cells (instigating apoptosis). OZONIDES transfer oxygen and change the environment in which anaerobic pathogenic germs live, making it aerobic. This prevents anaerobic germs, such as Fungi, certain Bacteria, Clostridia, Chlamydia and Parasites from reproducing and, in fact, kills them. The oil is surface-active and eliminates nests of fungi, bacteria, parasites and protozoans.

Anaerobes such as oxygen-sensitive fungi, yeasts such as Candida, bacteria such as Clostridia, parasites and tumour cells can be controlled and their reproductive cycle stopped with OZONIDES as these biological species have no or only limited defence mechanisms against oxygen.

#### **Ozonides effectiveness:**

Amoebiasis, Borreliosis (Tick Bite Fever), Rickettsia, Lyme disease, Brucellosis, Bilharzia, Toxoplasmosis, Blastocystis hominis, Malaria,

Tumours, Cancerous cells.

All anaerobic bacteria, e.g.

Staphylococcus, Clostridium, Actinomyces, Escherichia, Klebsiella, Salmonella, Vibrio, Bacteroides, Neisseria, Haemophilus, Helicobacter Pylori.

Oxygen sensitive fungi/yeasts, e.g.

Candida, Cryptococcus, Histoplasma.

Penetrating fungi, e.g.

Aspergillus flavus, Asp.niger, Blastomyces, Coccidioides Pneumocystis.

Parasites, e.g.

Protozoan (single cells), Metazoans (multiple cells), Cryptosporidium Helminthi, Entamoeba Taenia, Giardia Clonorchis, Leishmania Paragonimus, Plasmodium Schistosoma, Trichuris, Toxoplasma Nematoda, Trichomonas Enterobius, Filaria Ancylostoma, Necator Strongyloides, Toxocara Trichinella.

Viruses, e.g.

Dengue Fever, Ross River Virus, Parvo Toga, Papova Flavi, Herpes Retro, Adeno Rhabdo, Hepadna Arena, Picorna Reo (Rota), Orthomyxo Corona, Priones, Epstein-Barr, HPV (Papilloma)

#### **The Big Cleanup**

**Eliminating Fungi, Yeasts (Candida), Parasites, Bacteria, Protozoans, Overaged or Cancerous Cells**

General Application:

Half hour before breakfast and supper, into large glass of water 7 drops of **Ozonides Delta+** and drink. Can be increased to twice 10-15 drops, depending on severity of problem.

**NOTE: Ozonides are Not effective against aerobic bacteria, e.g .**

Streptokokkus Campylobacter, Enterococcus Bordetella, Corynebacterium Brucella,  
Bacillus Legionella, Bartonella,  
Listeria Treponema, Nocardia Borrelia, Proteus Mykoplasma, Shigella Rickettsia,  
Tb (*Mycobacterium tuberculosis*)

**Not effective against aerobic fungi, e.g .** Dermatophytes, Epidermophyton, Microsporum,  
Trichophyton, Sporothrix

## **Ozonides Delta+**

Ingredients: Concentrated oils of Wormwood (*Artemesia absinthium*), Mugwort (*Artesmisia vulgaris*), Black Cumin, Clove, Walnut, Marjoram, Garlic oil 1.5%, Olive and Ricinus.

Effective against: Tumours, cancerous cells, skin cancer, Malaria prophylaxis and treatment, Protozoan infections like Amoebiasis, Borreliosis (Tick Bite Fever), Rickettsia, Lyme disease, Brucellosis, Bilharzia, Toxoplasmosis, Intestinal fungal infection, Candida, skin and nail fungi, Eczema, Vaginal fungal infection, Parasites, Worms, Bacterial infections (anaerobic bacteria),

**Note:** Garlic oil 1.5% in Ozonide Delta+ are effective in eliminating cancerous cells (tumours).

Garlic oil is essential to control Protozoa infections and to control and prevent Malaria.

## **Ozonides Zeta** (same ingredients as in Delta+ but without garlic oil)

Ingredients: Concentrated oils of Wormwood (*Artemesia absinthium*), Mugwort (*Artesmisia vulgaris*), Black Cumin, Clove, Walnut, Marjoram, Olive and Ricinus.

Effective against: Intestinal fungal infection, Candida, skin and nail fungi, Eczema, Vaginal fungal infection, Parasites, Worms,

## **Ozonides Herbal (Jota) + 15% DMSO**

Ingredients: Concentrated ozonated oils of *Boswellia serrata* (Frankincense), Clove, Thyme, Mugwort, Marjoram, Bitter Almond, Rosemary, Oregano, Cinnamon.

Effective against: Prostate enlargement, Prostatitis, Ovarian cysts, Urinary tract infections (Bladder- and Kidney infections), anti-microbial, anti-fungal, antiseptic, antiviral.

Cinnamon oil in particular: Korea Gwangui Institute of Science confirms, that cinnamon oil has got anti-tumour properties and works against Cervical Cancer, Colon cancer, Melanoma and Lymphoma.

**Helicobacter pylori and stomach ulcers:**

Frankincense and Cinnamon oils are effectively treating H.pylori

## **Malaria Prophylaxis and Treatment with Ozonides Delta+**

China and the USA increasingly prepare and use ARTEMISININ for treatment and prophylaxis of Malaria. Artemisinin is the ingredient of the plant *Artemisia vulgaris* (Mugwort). It is a perennial herb growing in Europe, Asia, and North and South America.

Artemisinin is an active oxygen of complex structure, which eliminates protozoans, like Malaria.

German research has confirmed this. The product OZONIDE, imported from Germany, contains this herb extract.

The oil is taken internally. Any parasites entering the blood stream have little chance of survival. The scent of this oil is eliminated via the skin, which keeps the anopheles mosquito away, the cause of malaria.

However, as with other malaria prophylaxis (also pharmaceutical/chemical products), there is no 100% guarantee that malaria is prevented.

As advised by Bio-Chemists, twice a day 7 drops of OZONIDE taken with a glass of water about half an hour before breakfast and supper is sufficient as a malaria prophylaxis.

OZONIDE Applications, dosages and general therapy protocols:

*Note: Therapists may vary the dosages depending on condition of patient, severity of infection and whether the infection is acute or chronic.*

*Frail and/or very ill patients should start with one drop twice daily in a large glass of water and increase by one drop every day.*

**Tumours, Cancerous cells.**

Depending on age of patient, physical and mental strength and severity of illness, some therapists prescribe up to 15 drops three-times daily before meals. Some Oncologists advise to take up to 25 drops 3x daily in severe cases.

Skin cancer and breast cancer, Ozonides can be applied topically

**Amoebiasis, Borreliosis (Tick Bite Fever), Rickettsia, Lyme's disease, Brucellosis, Bilharzia, Toxoplasmosis, Blastocystis hominis**

As Protozoa re-generate in a cycle (egg – larva – adult), to treat effectively therapy should be at least for 2 months, better for 3 months to have best results.

Adults: before breakfast and supper, in a large glass of water, starting with 5 drops Ozonide Delta+, increasing day by day to 6/7/8/9/10 drops.

Frail people and children under the age of 12 the dosage can be halved.

**All anaerobic bacteria, e.g.**

**Staphylococcus, Clostridium, Actinomyces, Escherichia, Klebsiella, Salmonella, Vibrio, Bacteroides, Neisseria, Haemophilus, Helicobacter Pylori.**

**Oxygen sensitive fungi/yeasts, e.g.**

**Candida, Cryptococcus, Histoplasma.**

**Penetrating fungi, e.g.**

**Aspergillus flavus, Asp.niger, Blastomyces, Coccidioides Pneumocystis.**

Ozonides should be taken starting with 2 drops three-times daily before meals, increasing daily by one drop to up to 7 drops.

**Parasites, e.g.**

**Protozoan (single cells), Metazoens (multiple cells), Cryptosporidium Helminthi, Entamoeba Taenia, Giardia Clonorchis, Leishmania Paragonimus,**

**Plasmodium Schistosoma, Trichuris, Toxoplasma Nematoda, Trichomonas Enterobius,**

**Filaria Ancylostoma, Necator Strongyloides, Toxocara Trichinella.**

Ozonides should be taken starting with 2 drops three-times daily before meals, increasing daily by one drop to up to 7 drops.

**Viruses, e.g.**

**Dengue Fever, Ross River Virus, Parvo Toga, Papova Flavi, Herpes Retro, Adeno Rhabdo, Hepadna Arena, Picorna Reo (Rota), Orthomyxo Corona, Priones, Epstein-Barr, HPV (Papilloma)**

Ozonides should be taken starting with 1 drop twice daily before meals, increasing daily by one drop to up to 5 drops.

## Dogs

### Fleas, Worms, Parasites and protects from Tick Bite Fever

The oil is taken internally. Any parasites entering the blood stream do have little chance to survive. The scent of this oil is eliminated via the skin, which keeps parasites, like ticks, away.

Large dogs

2 drops into food daily and apply 2 drops to neck of dog every second/third day.

Medium and small dogs

1 drop into food daily and apply 1 drops to neck of dog every second/third day.

## Horses

In Austria and Germany horses are sprayed with water containing Ozonides, which effectively protects them from mosquito and tick attacks.

- 1) Into a spray bottle with about 500ml of water add 20 drops of Ozonides, shake well and spray a fine mist from legs to torso as well as other common areas of infestation.
  - 2) Into 10 ltr (that's about a bucket full) of horses' drinking water mix 20 drops Ozonides.  
It is sufficient to do this once a day.  
It not only helps to prevent tick attacks, but also keeps horses free of worms and intestinal parasites.
- 

## An important ingredient in Ozonides:

**Black Cumin Oil** is an important ingredient in **Ozonides**

"Black cumin oil is probably the single most important oil you can put in your system. Every time you take black cumin you are stimulating your immune system to fight on your behalf and increase natural killer cells." Null was referring to its ability to improve the immune system, treat cancer and HIV successfully. No truer words were ever spoken. Black cumin is also known as *Nigella sativa*, black seeds and kalonji and has been healing maladies of the body for more than 2,000 years.

Although black cumin has been used for centuries, only during the last 40 years has the true potential of this remedy been realized. Originally, black cumin was used mainly for migraines, asthma and allergies. It has now been shown to be successful in stimulating the immune system, treating HIV and healing cancer tumours. These are three of the most worrisome problems people are faced with today, except for heart disease which black cumin has been shown to treat also.

### **Black cumin is a viable option for immunity and auto-immune diseases**

When you look at the broad term "immunity," auto-immune diseases should also be included. These little black seeds have shown to improve the immune system by 72 percent in as few as four weeks. Two studies were done in 1987 at the I.I.M.E.R. in Panama City, Florida to verify the immune building effects of black cumin. The volunteer groups were given one gram of black cumin twice a day or a placebo. After four weeks, the end results showed a 72 percent increase in T-cell ratios and cell functional activity in most participants.

Black cumin is now a viable option to treat and/or heal people afflicted with auto-immune diseases which are a leading cause of death and disability for many. In 2010, there were approximately 23.5 million Americans afflicted with auto-immune diseases which include more than 80 serious diseases. Some of the types are rare and some quite common like rheumatoid arthritis and lupus.

## Black cumin annihilates pancreatic cancer tumours

Dr. Hwyla Arafat at the *Kimmel Cancer Center at Jefferson* conducted several studies using *Nigella sativa* (black cumin) to treat pancreatic cancer. The results were astounding with an 80 percent cancer tumour cell death. Pancreatic cancer is the fourth leading cause of cancer deaths in America with an overall 4.6 percent survival rate over a five-year period. Dr. Arafat went on to say, "*Nigella sativa* helps treat a broad array of diseases, including some immune and inflammatory disorders. Previous studies also have shown anticancer activity in prostate and colon cancers, as well as antioxidant and anti-inflammatory effects."

---

## Ozonide Case studies (The Power of Delta+)

Compiled from Medical Doctors/Clinics  
in Germany, P.R.China, Japan, Malaysia

### General Hospital, Kuala Lumpur/Malaysia

Patient G.S. male 42 Years old. Since 2009 no appetite, continuous weight loss, dizziness, very low in energy. Patient eats mainly uncooked vegetables and raw salads. Since 2009 treatment (Medical Doctor) with Chinese herbs. Unsuccessful. I recommended December 2012 **Ozonides Delta+**, starting with 3x15 drops in a glass of water before each meal, increasing slowly to 3x20 drops. Since August 2013 he takes 3x20 drops.

November 2013 he produces in his stool (within 7 days) two handful of *Ascaris lumbricoides*, up to 35cm long round worms.

### Japanese case studies of **Ozonide Delta+** application:

#### General Hospital, Tokyo/Japan

M.S., Male 82 years old

Diagnosed **Bladder cancer** at Tokyo Hospital. Start **Ozonide Delta+** Therapy 18th November 2013, 15 drops 3x day Ozonide Delta-Plus orally. After 4 months this cancerous haematoma was discharged with the urine.

A.Y., Female 60 years old

Small lesion in the brain, **Lalopathy** since 2 years ago, low motivation.

Start **Ozonide Delta+** 15th January 2013, 15 drops twice a day. Improvement allopthy, improvement of motivation, Feels better.

K.K., Female 68 years old

Fatigue, 2cm diameter **tumour in the right lung**, diagnosed malignancy by MRI and biopsy.

Start **Ozonide Delta+** since 4th August 2012, 15 drops twice a day.

Bloody sputum reduced, no tumour found by diagnostic imaging after 6 months.

### General Hospital, Oncology, Beijing/China

Reported 23/02/2013:

Male 24 years old.

Non-Hodgkin Lymphoma, 20-40 drops **Ozonide Delta+** a day,

3 months later, fever stopped.

Back to hospital, exam show no tumour tissue. Patient feels normal and healthy.

Before had standard oral chemo therapy without any improvement.

Female, 34 years old.

Uterus carcinoma (metro-carcinoma)

**Ozonide Delta+** 15 drops - 20 drops per day.

After one month's therapy pain decreased. Tumour shrunk, but not completely gone.

Ozonide therapy will continue.

## Germany case studies:

### Case 1:

Name: I.D. from K., age 37, fem.

Diagnosis: **Severe iron deficiency**, all treatment unsuccessful. Continued worsening over 2-3 years despite Iron substitution, (Her uncle heads a hospital department). Feels miserable.

Readings before treatment: Ferritin: 5-7 norm: 20-200  
IgE: > 300 norm: < 100  
stool: amoeba positive.

Therapy: Began with Metronidazole, with no effect.

**Delta+**, 2 courses of treatment each over 8 weeks with 4 weeks' break.

I Iron substitution continued.

Condition after treatment: Counts in normal range. After 3 months iron level constant and remained so for over 6 months even when all drugs were stopped.

Remark: This progress was observed by haematologists with great amazement and surprise.

### Case 2:

Name: H.H. from K., age 60, fem.

Diagnosis: Tired, **anaemia**, but no iron anaemia.

Blood count: Er 1996: 3.2 norm: > 4 million/ml  
Er 1997: 2.2  
Er 1998: 1.9  
Eosinophils: 8 norm: < 7

Therapy: Folic acid, B12, iron with no significant effect. Then 6 weeks course of **Delta+**

Dosage increasing to 10 drops up to 3 times daily in cold water before meals.

Condition after treatment: Er: 4.4. Other counts normalized. After 6 weeks state of good health.

### Case 3:

Name: A.S. from K., age 24, m.

Diagnosis: Tired, 1997 **increased liver counts**.  
alkalic phosph: 455 norm ca. 171  
eosinophiles: 12 norm < 7  
Bile duct blocked. Liver fluke found.

Therapy: To begin with Legalon, but little improvement. Then 4 weeks course of **Delta+**, increasing to 10 drops up to 3 times daily in cold water before meals.

Condition after treatment: Alkalic phosph. 176. Liver counts normalizing. Patient was now able to be independent, feels good.

### Case 4:

Name: H.L. from M., age 47, fem.

Diagnosis: Tired, **increased liver counts** since 1994, liver fluke found by bioresonance.  
Alkal. Phosph: 202 norm ca. 171  
gamma-GT: 78

Therapy: 4 weeks course of **Delta+**, increasing to 10 drops up to 3 times daily in cold water before meals.

Condition after treatment: Liver counts normalized. Patient feels well.

### Case 5:

Name: E.P. from K., age 80, fem.

Diagnosis: **Severe chronic diarrhoea. Ascarides positive, proteus high.**

Therapy: 4 week course of **Delta+**, increasing to 10 drops up to 3 times daily in cold water before meals.

Condition after treatment: Counts normalized. Diarrhoea disappeared, patient feels well.

#### Case 6:

Name: C.K. from K., age 6, m., lives on farm.  
Diagnosis: **Hyperactivity** syndrome. **Nightmares**, complex about being stalked  
Diagnosis: Neurotransmitter disorder. Positive test for intestinal flukes, pinworms, candida.  
Therapy: Ritalin refused by parents. 4 weeks course of **Delta+**, increasing to 10 drops up to 3 times daily in cold water before meals.

Condition after treatment: Neurotransmitter normalized. Other disorders vanished, nightmares vanished, marked change in behaviour. Restlessness vanished, behaviour is gentle, patient feels well.

#### Case 7:

Name: S.B. from K., age 10, m.  
Diagnosis: **Hyperactivity syndrome**. Eczema on both arms, anal eczema. Candida found, disorder of intestinal flora, no E.-coli.  
Therapy: Ritalin refused by parents. 3 weeks course of **Delta+**, increasing to 10 drops up to 3 times daily in cold water before meals, . (Eczema not treated externally).

Condition after treatment: Eczema disappeared, patient feels well, become calmer, is able to concentrate gain, appetite regained, eats three times as much. Parents say he is a different child.

#### Case 8:

Name: R.K. from K., age 57, m.  
Diagnosis: Very tired, exhausted, metabolic syndrome, reactions slowed down considerably, working and thinking sluggish, even impeded. Liver flukes positive with bioresonance. **Diabetes, triglycerides high, blood pressure high, liver counts high.**  
Alkal. Phosph. 191, gamma-GT. > 100. Blood sedimentation 47/20.  
Therapy: 3 months course of **Delta+**, increasing to 10 drops up to 3 times daily in cold water before meals.

Condition after treatment: Liver counts improved. Alkal. Phosph. 171, gamma-GT 73.  
Behaves like a different person, reactions normalized, state of health clearly improved.

#### Case 9:

Name: K.H. from K., age 70, fem.  
Diagnosis: **Rheumatism** for years, primary **chronic polyarthritis**. 6 months before consultation eczema all over the body, also in the eyes accompanied by pruritus which has become unbearable. She owns a dog. 7 kinds of parasites found with bioresonance. Abnormal blood counts.  
Therapy: 4 weeks course of **Delta+**, increasing to 10 drops up to 3 times daily in cold water before meals, then break, then 4 weeks **Delta+** again.

Condition after treatment: Blood counts improved. Eczema and pruritus vanished, wellbeing greatly improved. Flukes disappeared first, after 4 weeks treatment with Delta+ only 2 kinds of parasites were detectable.

#### Case 10:

Name: L.E. from K., age 80, m.  
Diagnosis: Severe **asthma, aortic aneurism**, persistent dry cough with severe strain on the heart causing gasping for air. Almost given up on by doctors, was looking for a nursing home. He owns a dog.  
Test for parasites was positive.  
Therapy: 4 weeks course of **Delta+**, increasing to 10 drops up to 3 times daily in cold water before meals. High doses of vit. C, B, E. Dog dewormed.  
Condition after treatment: Cough vanished, excellent state of health, patient is able to take care of himself again.

#### Case 11:

Name: R.S. from K., age 74, fem.

Diagnosis: **Disturbed sleep, depression.** Many sleeping pills failed. Pinworm found with bioresonance. Neurotransmitter disorder.

Therapy: 2 weeks course of **Delta+**, increasing to 10 drops up to 3 times daily in cold water before meals. Then L-tryptophane, stopped after 3 days due to intolerance. 3 days' break, then only ¼ tablet of L-tryptophane 3 times weekly. Delta+ 5 weeks in total.

Condition after treatment: Blood counts improved. Patient sleeps normally, no longer needs sleeping pills.

#### Case 12:

Name: G.B. from K., age 45, fem. Diagnosis: **Chronique fatigue syndrome** since 1995, **depression.** Bioresonance: candida, parasites, geopathic stress.

Therapy: 8 weeks course of **Delta+**, increasing to 10 drops up to 3 times daily in cold water before meals.

Condition after treatment: Blood counts improved. Feels like a different person, cannot believe it herself, body feels different, positive mood, fatigue vanished.

#### Case 13:

Name: J.F. from K., age 34, fem.

Diagnosis: During first pregnancy HELLP syndrome, tired, depressive. After pregnancy Crohn's disease, headaches, perception disorder. Diagnosis from elsewhere: MS.

Bioresonance: parasites positive.

Blood counts abnormal, thrombocytes reduced, autoimmune activities observed.

Therapy: Course of **Delta+** from Oct. 98 to Dec. 98, increasing to 10 drops up to 3 times daily in cold water before meals. Additional acupuncture.

Condition after treatment: Feels better as weeks progress, mood is good, diarrhoea vanished, perception disorder has disappeared.

#### Case 14:

Name: S.O. from B., age 30, fem.

Diagnosis: **Hay fever** worsening for years, allergies developing. Bioresonance: fungi in colon.

Therapy: 8 weeks course of **Delta+**, increasing to 10 drops up to 3 times daily in cold water before meals.

Result: Fungi disappeared, hay fever vanished, wellbeing very good.

#### Case 15:

Name: S.H. from M., age 24, fem.

Diagnosis: **Flatulence, loss of taste, liver counts slightly increased.** Alternating diarrhoea and constipation. Bioresonance: **liver flukes.**

Therapy: 1 week's course of **Delta+**, increasing to 8 drops up to 3 times daily in cold water before meals.

Result: Digestion normal, taste is returning, appetite improved, excellent state of health, become more cheerful.

#### Case 16:

Name: Z.M. from S., age 35, fem.

Diagnosis: **High liver counts** alternating since 1996, accompanied by pruritus when counts are high.

**Bilirubin increased.** Bioresonance: liver flukes, candida.

Therapy: 4 weeks course of **Delta+**, increasing to 10 drops up to 3 times daily in cold water before meals.

Results: Pruritus vanished, wellbeing improved.

Bilirubin dropped from 1.17 to 0.59, norm up to 1.10.

SGOT dropped from 40 to 10.

SGPT dropped from 124 to 20.

Gamma-GT remained constant at 26.

#### Case 17:

Name: S.L. from K., age 34, fem.

Diagnosis: **Vitiligo** (white spot disease) for 6 months on the arms and legs, flatulence.

Bioresonance: parasites.

Therapy: 4 weeks course of **Delta+**, increasing to 10 drops up to 3 times daily in cold water before meals.

Results: The old white spots disappeared, flatulence vanished, wellbeing improved accordingly.

#### Case 18:

Name: I.S. from K., age 37, fem.

Diagnosis: **Recurrent ovarian cysts**, operated on roughly twice every year. Bioresonance: **Ascarides**.

Therapy: 4 week course of **Delta+** since Dec. 98, increasing to 10 drops up to 3 times daily in cold water before meals .

Results: In May 99 no signs of new cysts.

#### Case 19:

Name: E.W. from S., age 60, fem.

Diagnosis: **Acute hair loss** in circles, accompanied by **digestive problems, flatulence, abdominal pain**. Bioresonance: parasites.

Therapy: 8 weeks course of Delta+, increasing to 10 drops up to 3 times daily in cold water before meals.

Results: Hair loss stopped, new hairs beginning to grow. Digestive problems solved, excellent state of health.

#### Case 20:

Name: E.T. from K., age 64, fem.

Diagnosis: **25 kg weight loss in 3 months**, aversion to meat, nausea. Bioresonance: parasites.

Therapy: 4 weeks course of **Delta+**, increasing to 10 drops up to 3 times daily in cold water before meals.

Additional vitamin injections.

Results: 2 weeks after treatment good appetite, 2 kg weight gain, wellbeing accordingly improved.

---
